# About XTREME Semiconductor™....

**XTREME Semiconductor™**, located just outside of Austin Texas, was

founded in 2004 as a “Solutions Company” focused on providing our customers with unique and viable solutions to product obsolescence problems. Our commitment is to

provide our customers with a reliable, long-term, and dedicated source of microelectronic products.

**XTREME Semiconductor™** is a full service company offering our customers the unique experience of being able to go to one source for their entire high reliability product needs. Whether you are in need of an industry standard product or a custom microcircuit, make **XTREME Semiconductor™** your first stop.

This is what makes **XTREME Semiconductor™** “Your One-Stop Solutions Company” for product Obsolescence Support.

**XTREME Semiconductor™** executive management and manufacturing team brings more than 100 combined years of experience in servicing the unique needs of our military, aerospace and space customers. Our team can assist you with product support from a growing list of standard military products, sourcing of hard-to-find obsolete products, providing design and manufacturing support for custom products or providing one of the many critical services you need to support your system design.

Early in 2005, **XTREME Semiconductor™** obtained DSCC MIL- PRF-38535 QML certification MIL-STD-883 Lab Suitability. Having QML certification allows **XTREME Semiconductor™** to manufacture critical semiconductor products meeting the original standard military drawing (SMD) or process to the original OEM specifications meeting stringent MIL-STD-883 requirements. **XTREME Semiconductor™** is DLA QSLD/QTSL Certificated as a trusted supplier of critical microelectronics to the Military. **XTREME Semiconductor™** proudly supports industry initiatives to stop the proliferation of Counterfeit product and is a proud member of ERAI since 2007.

**Unique Solutions, Quality and Reliability**, is what you can expect from your **XTREME Semiconductor™** experience.

# ***XTREME Semiconductor™ Vision....***

## ***MISSION STATEMENT***

To be the “***Best in Class***” solution for the Trailing Edge Technology and Obsolete products by providing a long-term, reliable, and dedicated source of supply for critical microelectronic products and services

## ***QUALITY STATEMENT***

To continually develop and improve internal and external capabilities, supply chain management, services and sourcing options providing a “***Best in Class***” solution for customers needing high reliability microcircuits and services.

# XTREME Semiconductor™ Solutions....

- **High Reliability Products....**

- Ceramic, metal can, monolithic, MCM's, Plastic Packages

- **Complete Manufacturing Capabilities....**

- MIL-PRF-38535 QML Certified

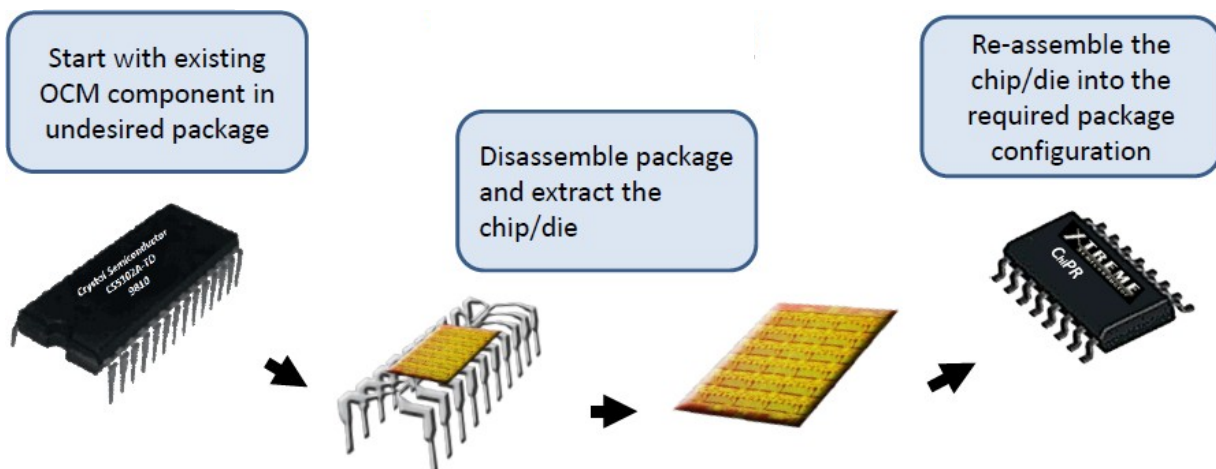

- **XTREME Semiconductor™ Certified EOL™ Product....**

- Risk Mitigation against Counterfeit Products

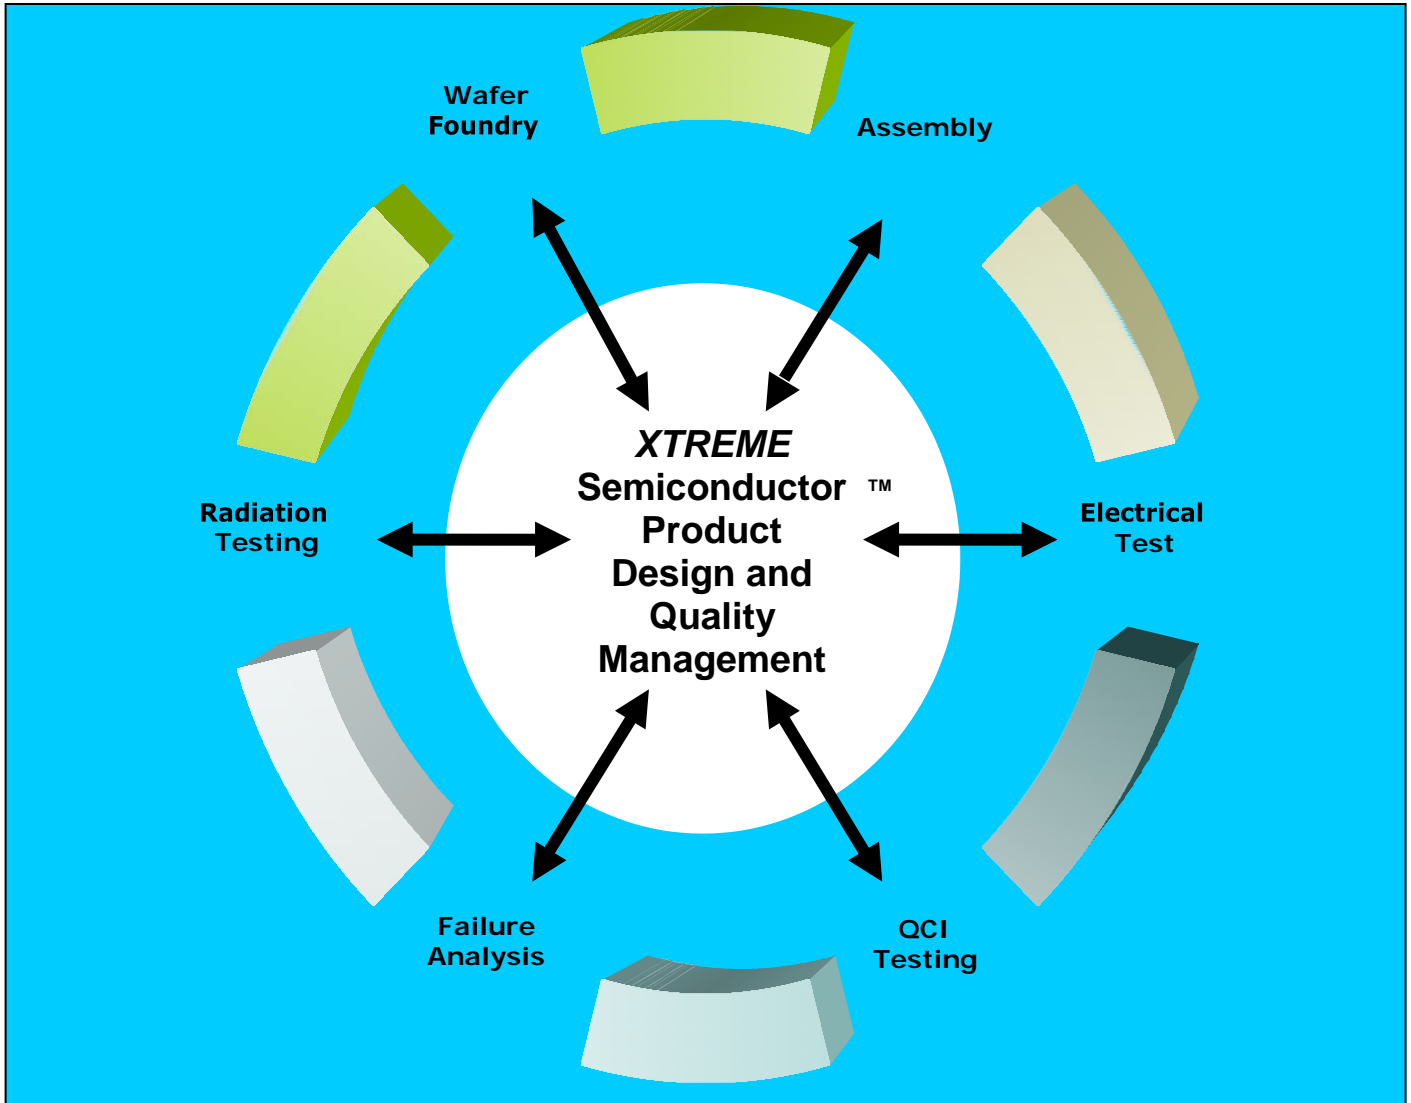

- **Chip Recovery™ Product....*C<sub>hi</sub>PR™***

- Form, Fit, Functional Replacement for Obsolete Products

# **XTREME Semiconductor™ Model for Success....**

- **Cost Effective:**
  - Leverages existing manufacturing capacity, maximizes capabilities and reduces overhead resulting in cost saving for our customers.
- **Capability:**
  - Manufacturing Partners are MIL-PRF-38535 QML Certified or have MIL-STD-883 Lab Suitability certification from DSCC.
- **Quality:**
  - All processes and procedures are managed by *XTREME Semiconductor™* under our MIL-PRF-38535 QM Plan.

# XTREME Semiconductor™ Capabilities and Services....

XTREME Semiconductor™ is a full service company offering our customers the unique experience of being able to go to one source for their entire high reliability product needs. All of XTREME Semiconductor™ design, manufacturing and other operational processes are designed to meet demanding military specifications for quality and reliability.

All of XTREME Semiconductors™ capabilities meet the rigorous requirements of the military standards. XTREME Semiconductor™ offers a variety of standard screening flows to choose from. Commercial, Industrial, Military level screening is available.

All screening and testing procedures are performed in accordance with MIL-PRF- 38535 and MIL-STD-883 screening and testing requirements.

- **Ceramic Package Assembly**

- Monolithic
- MCM
- Designing of Custom Packages

- **Screening**

- MIL-STD-883, QML & Standard Military Drawing (SMD)
- Commercial, Industrial, Military, and Custom Screening Flows
- Extended temperature device characterization -55°C to +200°C
- Full Environmental Testing, 100% lot screening, QCI Qualification

- **Electrical Test**

- Up-Screening
- Burn In, Dynamic & Static
- Extended Temperature Device Characterization -55°C to +200°C
- Software Development

- Quality Conformance Inspection**

- Mil-Std 883, Lot Qualification Group A, B, C & D Testing
- Steady State Life Burn-In
- Destruct Physical Analysis (DPA)
- Hast Testing

- Die Banking**

- Mitigating the need for costly end-of-life product procurements

- Product Sourcing**

- Extensive world-wide network to source hard to find DMS products
- *Certified EOL™* Product
- Manage end-of-life (EOL) procurements

- Plastic Assembly & Screening**

- Re-screening: Industrial & Mil-Temp

- **Chip Recovery™ ChiPR™ Product**

- True solution for DMSMS Product

Whether you are in need of an industry standard or a custom microcircuit, make XTREME Semiconductor™ your first stop. XTREME Semiconductor™ is setting a new industry standard as a full service company offering our Customer's the unique experience of being able to go to one source for their entire high reliability product needs.

Let us show you what XTREME Semiconductor™ can do for you.

High Performance, Quality, and Reliability are what you can expect from your XTREME Semiconductor™ experience.
